

Mohamed Oussama Braiek

AI Engineer & Full-Stack Developer

Tunis, Tunisia | Open to relocation

+(216) 92-994-247 | oussemabraiek@gmail.com | LinkedIn | GitHub | Portfolio

ABOUT ME

AI Engineer with 3+ years building production web systems and LLM-powered applications. Hands-on with RAG pipelines, agentic workflows (LangGraph), and vector search, delivered alongside strong Next.js / MERN engineering. Currently focused on shipping AI-native products and fully transitioning into an AI Engineering role.

AI PROJECTS

QuizzyAI — Adaptive Quiz Agent — *FastAPI, LangGraph, LangChain, FAISS, Groq, Next.js*

Agentic RAG application for self-directed learning: chunks and embeds PDF study material into a FAISS vector store; a LangGraph agent evaluates open-ended answers, dynamically adjusts difficulty, and generates Socratic explanations via Llama 3.3. Indexed 100+ page documents with under 2 s average query latency.

AI Portfolio Assistant (RAG) — *Next.js, LangChain, Ollama, TypeScript*

Self-hosted RAG assistant answering recruiter and client questions about my experience in real time, using semantic search over embedded documents and token-level streaming for sub-1 s time-to-first-token.

PROFESSIONAL EXPERIENCE

AI Engineer & Entrepreneur — Independent

Sep 2025 – Present

Built and shipped two production AI applications (QuizzyAI, AI Portfolio RAG) as part of a deliberate career pivot into AI Engineering. Independently launched and operated **FabrionLab**, a 3D-printed product business: designed all items in CAD, managed end-to-end manufacturing, and ran e-commerce and social media operations, fulfilling 1,000+ orders.

Software Engineer, OLINDIAS, Tunisia

Aug 2023 – Sep 2025

Developed and shipped 10+ features across web and mobile (Next.js, MERN, MEAN, Flutter, Kotlin) for international clients in the USA and Middle East, serving 1,000+ users. Optimized REST API performance, cutting average response times by 20% through query refactoring and caching. Collaborated with design and product teams to deliver end-to-end features from Figma wireframes to production.

Software Engineer Intern, OLINDIAS, Tunisia

Dec 2022 – Jun 2023

Built web and mobile interfaces (ReactJS, Flutter) and RESTful APIs (Node.js) supporting 500+ concurrent users.

Front-end Software Engineer Intern, OLINDIAS, Tunisia

Jul 2022 – Sep 2022

Integrated Figma designs into ReactJS components and customized WordPress themes.

OTHER PROJECTS

FabrionLab — E-commerce Platform — *Next.js, MongoDB, Zustand, Tailwind CSS*

Full-stack e-commerce platform with admin dashboard, order management, and product customization — built to support the FabrionLab 3D printing business.

Jocker Shop — *Next.js, Prisma*

E-commerce platform with authentication and product customization features.

TECHNICAL SKILLS

AI / ML	LLMs, RAG, Agentic Workflows (LangGraph), LangChain, Ollama, HuggingFace, OpenAI API, Claude API (Anthropic), Prompt Engineering, Vector Search (FAISS), n8n
Languages	Python, JavaScript, TypeScript, Java
Frontend	React, Next.js, Tailwind CSS, Zustand, Redux
Backend	Node.js, Express, FastAPI, Spring Boot, .NET
Mobile / DB	Flutter, Kotlin · MongoDB, PostgreSQL, MySQL
DevOps / Tools	Docker, Git, CI/CD, Cypress

EDUCATION

Engineering Degree in Software Development

Sep 2020 – Jul 2023

ESPRIT — Private Higher School of Engineering and Technology, Tunisia

Bachelor of Science in Computer Engineering

Sep 2017 – Apr 2020

ISIMM — Higher School of Informatics and Mathematics, Tunisia

CERTIFICATIONS

AI Engineering Bootcamp — Udemy (2026) | Flutter Development — Udemy (2023) | Full-Stack Web Development — Udemy (2022)
